# ABOUT THIS PRODUCT

As we continue to adapt to a new normal due to the current COVID pandemic, we're working with lots of businesses supporting their needs to create a safer environment to match official Government guidelines.

Our anti-bacterial film lamination is available as an option on the majority of your print products.

- Scientifically proven to destroy up to 99% of bacteria within 30 minutes
- Designed to prevent the producing, growing and replicating of bacteria
- High quality, durable film that is able to be wiped and handle spillages

# WHY CHOOSE US?

As a leading supplier of print finishing services across the UK, we work with a number of businesses across all industries. With a rich heritage since starting out in 1982, when it comes to print, we've done it all. Our reputation and outstanding customer service is something we pride ourselves on.

## **Here's some reasons why customers choose us;**

- Able to offer number of services including lamination, cutting and creasing, perfect binding and spot UV
- Over 100 years of printing experience within the team
- Quick turnaround of 24 hours depending on your job requirements
- Pick up and delivery service available depending on location
